Gentherm Expands Strategic Partnership with DUOMED to Enhance Distribution Across Europe

Jun 27, 2025

NOVI, Mich., June 27, 2025 (GLOBE NEWSWIRE) -- Gentherm (NASDAQ: THRM) a global market leader of innovative thermal management and pneumatic comfort technologies, today announced the expansion of its long-standing partnership with DUOMED into France. Building on years of successful collaboration in the Benelux region, this extension marks a strategic milestone as both companies work to deliver advanced patient temperature management technologies to more clinicians and patients across Europe.

Under this agreement, DUOMED will offer Gentherm's full patient temperature management portfolio, including the Astopad[®] resistive warming system, and the Vyttil-branded convective warming system, manufactured by Gentherm, to healthcare providers in France and Benelux.

"It's critical we work with market-leading partners who understand regional healthcare needs and can deliver local expertise," said Steve Fletcher, Senior Vice President and General Manager, Medical. "DUOMED's strong presence in Europe and deep relationships with clinicians make them a natural partner as we grow our footprint and reinforce our commitment to quality."

The partnership also aligns closely with DUOMED's mission to connect healthcare professionals with innovative medical technologies.

"Gentherm fits perfectly with our mission to deliver high-quality, end-to-end solutions that enable better care," said Christian Defly, President, DUOMED France. "Their solutions complement our portfolio and offer the innovation, quality and reliability our customers expect. In fact, early feedback from French clinicians has been especially positive, with many highlighting the superior quality of Vyttil blankets compared to other options on the market." Gregoire Plessia, Director of the Vyttil group at DUOMED added: "We are delighted to add the convective warming range, manufactured by Gentherm Medical, to our ever-growing range of Vyttil branded products, which are known for delivering quality, safety and value for money to the end users."
